

Careerpilot

Careerpilot has information on the full range of choices for 13-19 year olds, particularly useful at this time of year for Year 11 and Post 16 students, who need to decide what to do next and have a back-up plan if exam results are unexpected.

You can start by looking at:

[Choices at 16](#)

[Choices at 18](#)

[HESkills Map](#) (this will help Year 12s start identifying experiences and skills they can flat up on applications and personal statements).

And for parents and carers ...

[The Parent Zone](#) (answers questions that parents and carers really want to know like "Should my child do an apprenticeship or a degree?")
